

Bothrops atrox from Ecuadorian Amazon: Initial analyses of venoms from individuals

[Bothrops atrox from Ecuadorian Amazon: Initial analyses of venoms from individuals - ScienceDirect](https://www.sciencedirect.com/science/article/abs/pii/S0041010121000313)

The screenshot shows a web browser displaying the article page on ScienceDirect. The browser's address bar shows the URL: <https://www.sciencedirect.com/science/article/abs/pii/S0041010121000313>. The page features a navigation menu on the left with options like Outline, Highlights, Abstract, Graphical abstract, Keywords, and a numbered list of sections (1-5). The main content area includes the journal title 'Toxicon', volume and issue information, and the article title. Below the title, the authors' names are listed: Ricardo S.P. Patino, David Salazar-Valejuela, Evencio Medina-Villamizar, Bruno Mendes, Carolina Proaño-Bolaños, Saulo L. da Silva, José R. Almeida. A 'Highlights' section contains two bullet points: 'Ecuadorian Bothrops atrox venoms possess a variability in abundance of metalloenzymes isoforms.' and 'Enzymatic profiles evidenced variations in proteolytic and phospholipase A₂ activities at an individual level.' The right sidebar contains 'Recommended articles' and 'Article Metrics'.
