The screenshot shows a web browser displaying the SpringerLink article page. The URL in the address bar is <https://link.springer.com/article/10.1007/s10764-021-00221-7>. The page features a navigation bar with the SpringerLink logo, a search bar, and a 'Log in' link. Below the navigation bar, the article title is prominently displayed: 'An Update of the Geographic Distribution of the Red-Mantled Saddle-Back Tamarin, *Leontocebus lagonotus* (Callitrichidae), in Ecuador'. The authors listed are Diego G. Tirira, Lielia Sánchez-Sánchez, and Sara Álvarez-Solís. The article is published in the *International Journal of Primatology*, volume 42, pages 600-617, in 2021. The abstract text is visible, starting with 'Understanding the geographic distributions of primates is necessary to ensure effective conservation strategies. Nonetheless, many gaps persist in information regarding the range limits of platyrrhines. *Leontocebus lagonotus* is no exception; it is one of the least studied primates in Ecuador and its geographic limits are poorly known. We obtained 296 records of its presence in Ecuador from field studies (between 1996 and 2020), museums, the literature, and databases. Of these, we validated 211 records and used 106 (excluding grouped points) to determine the potential distribution of this species using an ecological niche model (MaxEnt). The model suggested that the species' distribution in Ecuador covers 64,028 km². Based on confirmed data, the extent of occurrence was 38,226 km², but after updating it with layers of...'. On the right side of the page, there is a 'Buy article PDF' button for USD 39.95, with a note that the price includes VAT (Ecuador) and provides instant access to the full article PDF. There are also links for 'Rent this article via DeepDyve' and 'Learn more about institutional subscriptions'. At the bottom of the page, there are tabs for 'Sections', 'Figures', and 'References', and an 'Abstract' link. The Windows taskbar at the bottom shows the search bar with 'Buscar', several application icons, and system tray information including 24°C, ESP, and the date/time 09:06 a.m. 04/04/2023.
