

ANTIMONY POLLUTION THREATENS SOILS AND RIVERINE HABITATS ACROSS CHINA: AN ANALYSIS OF ANTIMONY CONCENTRATIONS, CHANGES, AND RISKS

<https://www.tandfonline.com/doi/full/10.1080/10643389.2023.2279882>

The screenshot shows the Taylor & Francis Online interface. At the top, the navigation bar includes 'Taylor & Francis Online', 'Log in', 'Register', and 'Cart'. Below this, a breadcrumb trail reads: 'Home > All Journals > Critical Reviews in Environmental Science and Technology > List of Issues > Latest Articles > Antimony pollution threatens soils and r...'. A search bar is present with the placeholder text 'Enter keywords, authors, DOI, etc'. The main content area features a 'Review Article' section with the title 'Antimony pollution threatens soils and riverine habitats across China: An analysis of antimony concentrations, changes, and risks'. The authors listed are Lianhua Liu, Roberto Xavier Supe Tulcan, Mengchang He, Wei Ouyang, Qingwen Zhang, and Christian Miguel Huarez Yarleque. The article was published online on 15 Nov 2023. A 'Read this article' button is prominently displayed. Below the title, there is an 'Abstract' section which begins with 'The adverse effects of antimony (Sb) pollution on ecosystems and human health caused by its use, enrichment, and bioaccumulation have become global environmental problems, particularly in China. Based on a scientometric analysis of the research topics and evolution of Sb pollution, 210 peer...'. To the right of the abstract, there is a 'Related Research' section with buttons for 'People also read', 'Recommended articles', and 'Cited by'. The bottom of the page shows a Windows taskbar with the date 19/1/2024 and time 18:20.
